

IN THE CLAIMS

Claims 12-13 have previously been cancelled, without prejudice, as being drawn to a non-elected invention.

Claims 14-16 have previously been cancelled, without prejudice, as being drawn to another non-elected invention.

Please amend claim 1.

Please enter the pending claims as follows:

1. (Currently Amended) A structure disposed near each corner of a die in a space in a scribeline at an intersection of a horizontal scribeline and a vertical scribeline comprising:
 - a first set of features at a particular layer of processing a wafer, said first set of features being a subset of product features, said first set of features surrounded with a number of identical features; and
 - a second set of features adjacent to said first set of features, said second set of features differing from said first set of features in polarity, said polarity referring to placement of an interior of a feature on one side of an edge versus on the other side of the edge pattern factor, said second set of features being unique, said second set of features created by geometric transformation of said product features,

~~including rotating, space scaling, and linewidth scaling wherein said second set of features occupies a smaller portion of said space than said first set of features.~~

2. (Original) The structure of claim 1 wherein critical dimension (CD) is measured on said first set of features.
3. (Original) The structure of claim 1 wherein said first set of features and said second set of features differ in spaces between features.
4. (Original) The structure of claim 1 wherein said first set of features and said second set of features differ in linewidths of features.
5. (Original) The structure of claim 1 wherein said first set of features and said second set of features have the same pitch for features.
6. (Original) The structure of claim 1 wherein said first set of features comprises a first array of holes.
7. (Original) The structure of claim 6 wherein said first array of holes comprises a 5-by-5 square array of holes.

8. (Original) The structure of claim 6 wherein said second set of features comprises a second array of holes.

9. (Original) The structure of claim 8 wherein said second array of holes differs from said first array of holes in size of array.

10. (Original) The structure of claim 8 wherein said second array of holes differs from said first array of holes in space between holes.

11. (Original) The structure of claim 8 wherein said second array of holes differs from said first array of holes in linewidths of holes.

12-16. (Cancelled)
